

Newly Qualified Pharmacist Training Programme (NQP)

With PGDip and Post-registration Foundation credential

A challenging, robust training programme to develop outstanding early career pharmacists in patient facing roles

OUR COMMITMENT

To create, in conjunction with partners, a workforce of early career pharmacists who are

- Clinically sound
- Comfortable with complexity and autonomy
- Research literate
- Educationally competent
- Leadership ready
- Prescribing prepared

OUR ASSESSMENT

The programme is the only one in the UK leading to dual recognition:

- Postgraduate Diploma in Pharmacy Practice
- Royal Pharmaceutical Society Post-registration Foundation credential

Students are assessed by **expert clinical academics** for knowledge and application, local **senior clinicians** for practice and behaviour and by the **RPS National Panel** for professional development against the RPS Post-registration Foundation framework.

CPD OR NQP?

Looking for individual modules to support discrete development?
Not able to commit to a 2 year programme?
Just looking for support to achieve the RPS credential?

Speak to the team today

OUR STRATEGY

Using **blended learning** and **expert practitioners** our flexible programme of study ensures a clinical grounding that is relevant to the students own workplace, and operation expertise to achieve workforce flexibility and organisational goals.

We are intensely focussed on skill acquisition to achieve **immediate patient benefits**, and so our teaching leverages advanced clinical expertise and personal reflection to change practice for the very next patient encounter.

OUR PARTNERS

Our students study all over the East of England, Hertfordshire and London and partners include

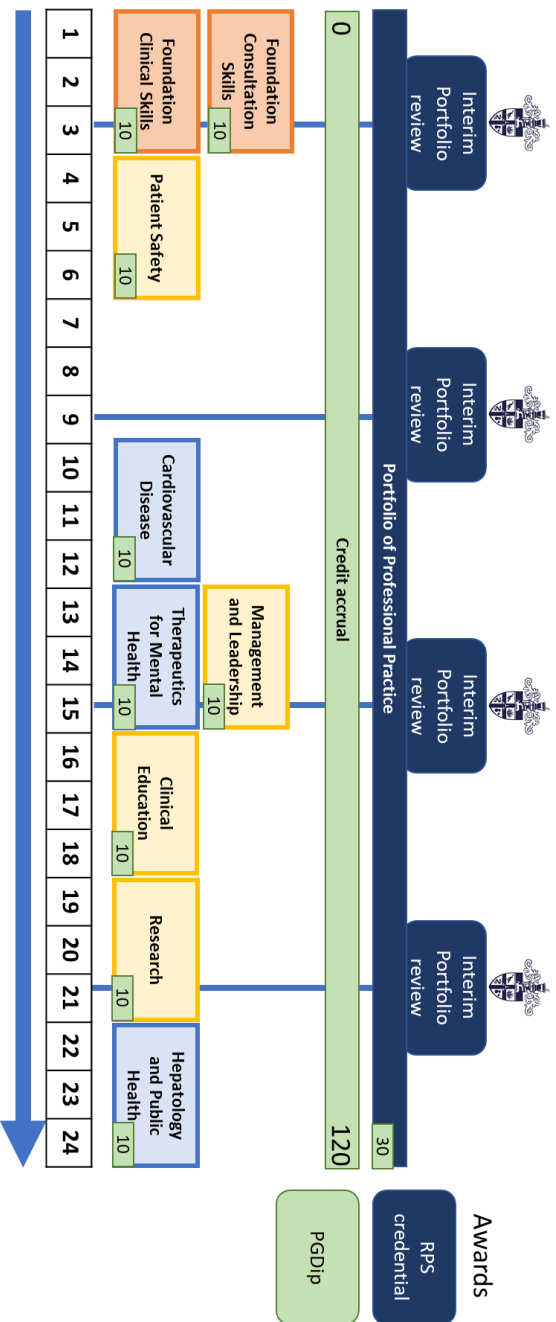

- Acute NHS Trusts
- GP Consortia
- Mental Health Partnerships
- Community Health Care organisations
- Private Hospitals

We also welcome applications from Community and Health in Justice pharmacists

ROYAL PHARMACEUTICAL SOCIETY

UEA
University of East Anglia

Typical Programme Timeline

- Compulsory clinical module
- Compulsory professional module
- Example of student selected clinical modules
